

The team (JunHe) is a full-service firm with a market-leading projects and infrastructure team. Its expertise in large PPP projects remains in demand from a wide range of clients, including domestic energy corporations and local governments.

—Chambers Asia-Pacific 2019

Infrastructure and Project Finance

The continuous achievements of our infrastructure and project financing team can be seen in many recent investments and developments such as the building of roads, bridges, water and power facilities that cover basic public needs. It is also reflected in the rise of environmental protection to improve the quality of life. The attraction of foreign investment, the adoption of project financing and the PPP model are all witness to the team's development, not to mention the recent rise of the "going out" of Chinese enterprises and the gradual implementation of the strategic conception and the consummation of the "One Belt One Road" initiative.

Our Team

JunHe's infrastructure and project financing team is comprised of more than 30 lawyers, including over 10 partners and associates who are based in our Beijing, Shanghai, Guangzhou, New York and other offices. This team includes lawyers with considerable overseas experience in the areas of infrastructure and project financing gained at prestigious international law firms or corporations, as well as local talent who have gained extensive experience due to economic development in large domestic projects. Our partners and associates all have over a decade of experience in this field and have extensive expertise and knowledge.

Due to our consistent outstanding performance and testimonials from our clients, our infrastructure and project financing team is regularly recognized as Band One and we have been named as a 'Top-tier Recommendation' law firm in respect to infrastructure and project financing practice in China by Chambers Asia-Pacific, Asia Pacific Legal 500, Asia Law & Practice and the International Financial Law Review.

Core Areas of Practice

- **Power:** thermal power, wind power, hydropower, nuclear power, solar power, garbage/biomass power;
